SMARTMUSIC TRANSFORMS THE WAY STUDENTS LEARN

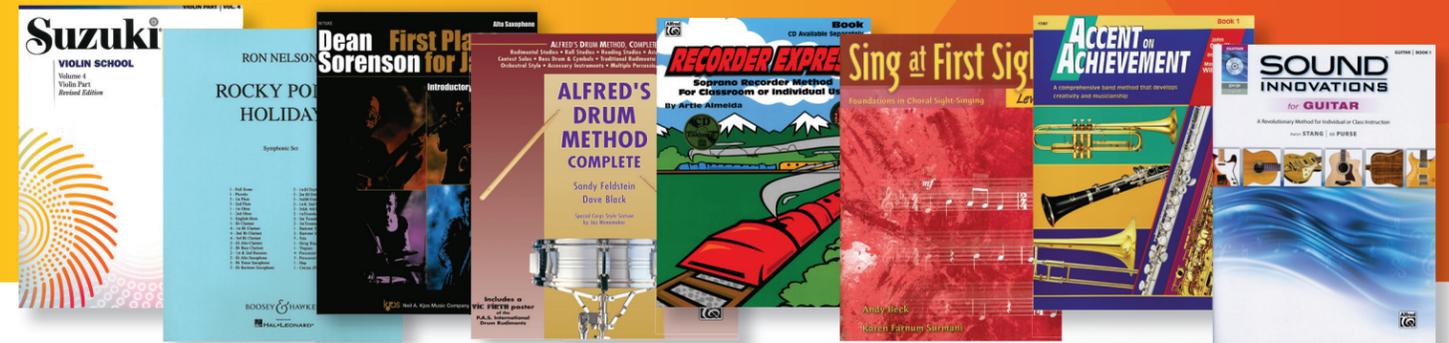

As students play along with music on-screen, SmartMusic gives them immediate feedback on their performance by showing correct pitches and rhythms in green, and incorrect in red. They are also able to hear their part in context with SmartMusic's professional background accompaniment. Students can record and play back their performances for self-assessment. If their teacher assigned the piece, grading results are instantly communicated with the use of SmartMusic's Gradebook feature.

SmartMusic integrates technology and documents student achievement, letting you spend more time teaching music!
